DETAILED ACTION

Status of the Claims

1. This action is in response to the application filed on August 28, 2001. Claims 1-25 are pending.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-15, drawn to define content groups and assign contents into one
 of the content groups, and tracking user rights of the contents, classified in
 class 705, subclass 54.
 - II. Claims 16-21, drawn to translate order confirmation into a standardized format, classified in class 717, subclass 136.
 - III. Claims 22-25, drawn to install additional systems on a rendering device if the rendering device is not adequate, classified in class 709, subclass 223.
- 3. The inventions are distinct, each from the other because of the following reasons:

 Inventions I and II are related as subcombinations disclosed as usable together
 in a single combination. The subcombinations are distinct from each other if they are
 shown to be separately usable. In the instant case, invention I has separate utility such
 as defining content groups and assign contents into one the content groups, which can
 be used for copyright management for digital contents; invention II also has separate

utility such as translating order confirmation into a standardized format, which can be used for compiling files in a database. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as defining content groups and assign contents into one the content groups, which can be used for copyright management for digital contents; invention III also has separate utility such as installing additional system on a rendering device if the rendering device is not adequate, which can be used for network management. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as translating order confirmation into a standardized format, which can be used for compiling files in a database; invention III also has separate utility such as installing additional system on a rendering device if the rendering device is not adequate, which can be used for network management. See MPEP § 806.05(d).

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
